Condition	New	State	Queensland
Suburb	WARANA	Engine Make	

Description

We have a wide range of tiller steer boats with a model to suit your needs. For all our Tiller Steer boat models and full details, sizes and options click [here](#). Overview of each model series.

Avenger The Avenger range has models to suit all; the Adrenalin Hull is featured on Avenger models 4.28 and up. Models 4.48 and up have 3mm bottoms and 3 mm sides with the 4.28 having 2.5mm sides. The Adrenalin hull with a deeper V and wide beam also incorporates a reverse chine (no reverse chine applicable on the 4.28). These features give you an excellent ride; enhance stability, great control and optimal fuel efficiency. All models feature front and rear cast platforms with hatches, electric motor plates are fitted off the front gunwhale, with a bow sprit and roller fitted on the front deck. A sounder mount and switch panel plate is fitted within the hull for electronic needs. Plenty of rod holders are on offer with 6 plastic holders fitted to the wide side decks. Seating is in the form of two full upholstered folding seats with five socket positions. Fuel tanks are fitted to models 4.48 and up, and all models are available either painted or non-painted.

All Rounder The versatile Allrounder features the popular Adrenalin Hull. When trying to find a boat to suit many different estuary applications can be tough: however our ALLROUNDER models have made this choice easy. A full open floor creates a copious amount of room that carries fishing and camping essentials. An anchor well together with the new feature of a bulkhead with opening, as well as one long side pocket that gives additional storage options. A rear cast platform also provides a spot for fuel tanks and a battery. Topped off with wide side decks for strength (and a place to fit rod holders), with many seat pedestals positions and a rear step & rail for ease of entry. As the name says this is a real ALLROUNDER.

Ranger Designed to handle all the "TUFF STUFF" the Ranger is well suited for the pro fisherman and die-hard anglers. Available in 4.6m as a tiller. With high tensile 5083 Plate 4mm bottom with 50mm capped keel and reverse chines the Ranger has the size and strength to get the job done. With the checkerplate floor and 3 seat positions the deck can be opened up to give you the freedom to move comfortably about your boat as you reel in the big one!

Nomad & Nomad HS Embark on an adventure today in a Sea Jay's premium car topper range, the Nomad & Nomad HS. Our Nomad range has a unique v-nose entry that helps slice through swell and chop while the bottoms flatten out toward the transom allowing greater stability at rest. The smaller models make loading onto a roof rack, camper trailer or caravan effortless due to their flat deck and handles forward off the gunwhales. Not only does this prevent anything catching, but also reduces the risk of damaging both your boat and racking. Our Nomad HS (75mm higher sides) is also well suited for car topping and very appealing for the estuaries of the Top End. Be sure to check out the Creek Masta HS which is a Nomad HS that has a floor, front cast deck off the front seat, electric motor pad & battery tray included as standard.

Creek Masta The CREEK MASTA HS is a v-nose model that is an extension from our standard Nomad range, taking this model to the next level. This model as the name suggests would be a good little boat for sleeking around the creeks and estuaries, with the part cast platform this gives a stable platform for flicking a lure, throwing a cast net or setting the crab pot. A Minn Kota plate on the front deck allows the use of an electric motor and the part floor makes moving around a breeze. Take a look at the features and specifications of this model as it is sure to please.

Creek Masta HS to the next level - take a look at the SWIFT range.

Swift Our SWIFT range of V Nose Punts are for the angler who wants more useable features than just a pair of thwart seats and a rope shelf that most traditional dinghies have to offer. A full carpeted floor with (5) floor sockets allows for greater seat positioning and combined with a raised casting platform, gives 360° of fishable area. To keep the floor clutter free, a tank rack is located under the casting platform with a CE certified fuel line running under the floor to the transom. Wide side decks are also a standard feature that provide maximum strength and functionality. All SWIFT are now built as High Side (HS) option as standard giving greater internal volume to the boat.

Magnum 2 The new era Magnum, traditionally a dinghy with two thwart seats was a standard dinghy requirement, is now an improved dinghy to meet our changing times. The Magnum 2 has the traditional two thwart seats still featured, however a part cast platform is fitted off the front thwart seat. An anchor well (plastic with drain) is a practical addition in the front deck, as well as a wide ¾ floor fitted between the seats, with a carpeted tank rack behind the rear thwart. Also to make life easier a rear step and rail on the port side has been fitted, as well as front rails and rear rails add to the features. Whether your boat is big or small, electronics is nearly always a requirement so a switch panel plate is fitted for this purpose. Also take a look at the MAGMUM 2 X PACK range.

Magnum X Pack 2 The Magnum X Pack ranges extends to our larger

open boat models that are built as a robust aluminium dinghy providing years of trouble free boating. Wide beams are a standard feature through the Magnum range producing a stable platform with high sides creating added safety especially when children are on board. All models 4.55 and up boast our Sure Trac Hull for enhanced performance as well as 3mm bottoms and 3 mm plate sides for extra strength and durability. With a model to suit even the budget conscious, our larger Magnum X Pack range will help make your boating experience a memorable one. Angler Our Angler models are the start of our open boat line up. These smaller dinghies are perfect for the novice angler looking for their first boat as they are hassle free and easy to maintain. Light weight yet tough, these models are well suited for car topping if so desired with our 3.15 model being purpose built to be used as a tender. The Angler model offers an affordable boating option which is compact and nimble that will take you places other larger boats can't reach. Punt When stability is paramount in a small boat, you cannot go past our Square Nose Punt range of tinnies. With a true flat bottom, our punt offers an extremely stable platform while creating minimal draft making it perfect for motoring through shallow water. The square nose punt is perfectly suited for crabbing, throwing a cast net and fishing which is why it still remains an old favourite with fishermen today.
